**GENERAL FEATURES**

- Prevents ice from building up on the outdoor unit base when operating in heating mode for an extended period of time during low temperature, high humidity conditions.
- Operation of base pan heater is controlled by outdoor unit
  - Energized when unit is in heating mode, compressor is running and outdoor temp drops below 39° F.
  - Connects to CN51 on the outdoor control board of CITY MULTI® PUHY and PURY K-Series Units..

**INSTALLATION NOTES**

- Use of base pan heaters is recommended when:
  - Ambient temperatures are expected to be below freezing for periods longer than 72 hours straight or;
  - Continuous sub-zero outdoor ambient conditions are expected to last longer than 24 hours.
- To prevent the possibility of freezing, outdoor units should not be installed directly on the ground. Follow the guidelines in the installation manual for outdoor unit mounting.
- Recommended installation of a Ground Fault Interrupt (GFI) circuit breaker, depending on installation area to prevent electric shock.
- For additional information, see the base pan heater installation manual.
- For further details on installation, refer to outdoor unit technical service manual.

**NOTE**

- Heaters are effective only when used in conjunction with Snow Hoods and Snow Hail Guards.
